Please amend the present application as follows:

Specification

The following is a copy of Applicant's specification that identifies language being added with underlining ("___") and language being deleted with strikethrough ("——"), as is applicable:

Page 5, lines 10 through 15.

With reference to FIG. 1, the CP 102 serves as a central control point of the device detection system ~~10~~ 100. Accordingly, the CP 102 normally comprises a user interface with which a user communicates with the device detection system 100. As will be apparent from the discussion that follows, the CP 102 is used to send commands to the various hosts of the network so that information regarding these hosts (*e.g.*, the number and nature of devices connected to these hosts) can be retrieved and communicated to the user.
